Fast Facts

Lyon Rural Electric Cooperative has initiated a very successful energy efficiency program the past number of years by providing rebates and incentives to members.

We are committed to minimizing the impact of rising power costs by being proactive in our efforts. As the Cooperative grows, it is important to promote and educate members on the efficient use of electricity. We do a number of things to meet this objective. We continue to promote geo-thermal systems and air to air heat pumps. The Cooperative continues to offer special incentives including rates and rebates.

Because rebate qualifications vary, review the rebate form for requirements prior to installation. In general, members planning to apply for rebates should keep receipts and must fill out the appropriate rebate form.

- Keep packaging from retail packages as we might require labels or product cut outs.
- Air to Air Heat Pumps must meet energy star ratings as a unit/coil combo. AHRI certificates must be supplied.
- Rebates will be made to the member in a form of a check directly from Lyon REC.
- Lyon REC reserves the right to make an onsite visit to the property of the member to verify that the appliance/product is being utilized at the location indicated by the member.
- Lyon REC provides energy audits free of charge to its members.

Equipment Rebates

Electric Resistant Water Heaters

Premium Quality	per unit
80 gallon or more (min. energy factor .90).....	\$200
Must allow load control device	
Must have energy factor of .90 and =>80 gallon	

New home construction or a gas replacement-you are eligible for a free 85 gallon water heater if available. Must be approved prior. Must allow load control device to be installed.

Energy Star Appliance

Refrigerator (minimum volume of 3 cubic feet).....	\$25
Dishwasher.....	\$25
Freezer.....	\$25
Clothes Washer.....	\$50
Must be energy star rated to qualify	

Each member-consumer account is limited to a maximum of \$250 in combined appliance rebates. The member must provide a dated invoice from the dealer where the appliance was purchased. The yellow energy guide label shall also be provided as proof the appliance qualifies as an Energy Star rated appliance. The member must agree to operate and use the appliance only at a location served by the cooperative.

Energy Efficiency Loans

Lyon REC provides low interest loans for installing energy efficient heating and cooling equipment to its members. Loans available are 5% APR for up to 5 years. Maximum loan amount is \$12,500. Member must fill out a loan application and be approved prior to installation. There is a \$75 application fee if loan is completed. Members must own the ground where the equipment is located.

Electric Heating & Cooling Equipment

Ground Source Heat Pumps

Must be energy star rated to qualify
COP>=3.3 & EER OF >=14.1.....

Ductless Mini-Split Heat Pump...\$200

Air to Air Heat Pumps

Must be energy star rated to qualify. AHRI certificates must be provided.

>=14.5 <15SEER.....	\$400
>=15-<16 SEER.....	\$500
>16 SEER.....	\$600
If electric backup is used	
>=14.5 <15 SEER.....	\$600
>=15-<16 SEER.....	\$700
>16 SEER.....	\$800

Central Air Conditioning

Must be energy star rated to qualify

HSPF>=8.5,SEER>=15,EER>=12.5.....

Window/Portable Air Conditioning.....\$25

Must be energy star rated to qualify.

Appliance Recycling Rebates

A refrigerator, freezer, and a window air conditioner qualify for this recycling rebate. The appliance must be clean, empty, in working order and owned by a member of Lyon REC. The appliance will be picked up and properly disposed of by the recycling contractor that is authorized by Lyon REC to provide the recycling service. The consumer will make pickup arrangements directly with the authorized recycling contractor to schedule a qualifying appliance to be picked up, recycled and properly be disposed of. The appliance must be moved from the house/buildings and ready for pickup. The member/consumer will receive a \$25 rebate for each qualifying recycled appliance. Each consumer is eligible to collect up to 3 appliance recycling rebates.

Other Rebates

Insulation Rebates

Insulation with Electric Heat

Attic/Ceiling-30% of cost of insulation or \$800 maximum combined ceiling and wall. Ceiling must be R38 or greater to qualify.

Wall Insulation-30% of cost of insulation or \$800 maximum combined ceiling and wall. Wall insulation must be R19 or greater to qualify.

Home is required to be electrically heated and be used as the primary heating source of the building. Must be professionally installed by a registered contractor for blown-in, insulating concrete forms, ridged Styrofoam panels and/or Structural Insulated Panels type insulation. Member must provide receipts and proper documentation.

Commercial/Ag/Industrial Lighting Rebates

Commercial/Ag/Industrial lighting rebates are available.

Compact Fluorescent Light Bulbs, T-8 and /or T-5 Fluorescent Tubes:

\$100 per kW-The total lighting electric rating must be a minimum of .5 kW to qualify for this rebate.

Light Emitting Diodes (LED's)

\$200 per kW-The total lighting electric rating must be a minimum of .5 kW to qualify for this rebate. Security lights below are already rebated and excluded from this rebate.

LED Security Lights

Farm LED security lights are available at a discounted rate. We will install a LED security light on a pole that has power on it for \$150.00 plus tax. (same price as a high pressure sodium)
